**August-September 2010**

*A Not-For-Profit 501(c)3 Corporation*

*Our Mission:*

*Provide a forum for maintenance information exchange to all industries that can benefit from improved equipment reliability through networking, demonstration, benchmarking and leveraged training.*

## August 2010 Program

### **1-Day Program: "Selecting & Implementing a CMMS Program"**

**By: Aquitas Solutions & PCA**

**Wednesday, August 4th, 2010**

**8:30 a.m. – 9:00 a.m. Registration &**

**FREE Continental Breakfast**

**9:00 a.m. – 4:00 p.m. Program**

**Stillwater Meridian Technology Center, OK**

**No Fee for Paid Members**

### Selecting & Implementing a CMMS Program

World-Class organizations view Asset Reliability and Best Practices as a strategic initiative that delivers availability (uptime) and manages resources (labor, materials, & capital) at the lowest possible cost.

#### This Workshop Will Cover

- Asset Reliability Issues Today
- Software Methodology
- "Best Practices" Improvement Approach
- CMMS/EAM Evaluation
- Implementation Process
- Q&A

### About Our Speakers Scheduled for August

#### **Ed Morris, VP Aquitas Solutions**

With more than 25 years of maintenance management and business operations experience, Ed provides a well-rounded industry and management perspective for Aquitas Solutions' clients. As VP of Business Solutions, Ed provides unmatched customer dedication with a deep understanding of the most efficient way to implement and receive immediate results from an Enterprise Asset Management (EAM) solution.

#### **Jim Davis, CMRP, Director of Operations/Sales PCA**

Jim has responsibility for various client engagements, project management, and sales and marketing support. Jim also assists in conducting client assessments when needed. Jim has extensive experience with team-facilitation, problem-solving, statistical process control, continuous improvement and project management.

#### **Aquitas**

Aquitas Solutions is a leading management consulting company serving asset-intensity organizations across various industries. The company's primary focus is to help its clients optimize asset performance.

#### **PCA**

Performance Consulting Associates is one of the leading providers of Maintenance Management and Asset Management solutions in North America.

# OPMUG NEWS

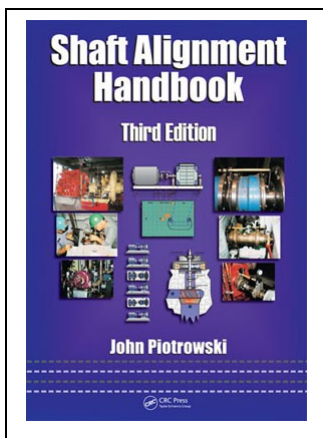

**Gary Vannoy,  
OPMUG 2010  
President**

Gary is working to make OPMUG the best training value in Oklahoma. He knows a thing or two about training as a US Postal Service Training Development Specialist. Gary explains it this way, "We understand companies are struggling in the tough economy. That's why our mission -- as volunteers of this organization -- is to help our members get the best value out there. That means not only the best predictive maintenance training but also the lowest cost. I challenge you to find a better value than OPMUG anywhere in the USA!"

## Training Classes

Our April "Off-Line and On-Line Motor Testing" class by Shermco in April was overbooked so Jason Phipps, our training director who works for Southern Oklahoma Technology Center said he is planning on holding another class this year, time & date, to be announced.

Our upcoming training class "Shaft Alignment Level I by John Piotrowski" scheduled for August 16<sup>th</sup>-18<sup>th</sup> at the Tulsa Technology Center still has seats available. Charles Madison, our training director who works for TTC, said OPMUG is committed to holding this class, so, "it is a definite go".

John Piotrowski literally wrote the book on shaft alignment. Get this class through OPMUG for less than half the retail cost.
